

FLIGHT STREAM 510

ADVANCED COCKPIT CONNECTIVITY AND AVIONICS INTEGRATION

The Garmin Flight Stream 510 is a wireless connectivity device that seamlessly transfers flight plans, weather and other information between your avionics system and smart-device apps. Using Wi-Fi® and Bluetooth® connections, the data is exchanged smoothly.

This advanced technology reduces pilot workload and optimizes time in the cockpit.

KEY BENEFITS

- ✓ Seamless data transfer and flight planning
- ✓ Real-time weather and ADS-B traffic updates
- ✓ Wireless integration between smart devices and avionics
- ✓ Reduce manual data entries
- ✓ Easy database updates and flight planning using smart-device apps such as 'Garmin Pilot', 'ForeFlight Mobile' or 'FltPlan Go'

INSTALLATION

The SB will be applicable for G3000 with avionics software 29.04 and on (load 23 to load 26 requires upgrade to load 29 Free Of Charge).

Contact us to verify if your cockpit configuration meets the requirements for this modification.

OUR GOAL IS TO MAKE YOUR LIFE EASIER
