

## TAXI AND LANDING LIGHTS

### SEE MORE, FLY BRIGHTER

Lighting plays a critical role in enhancing visibility during takeoff, landing and taxiing. With the latest LED technology, you can now experience brighter illumination, wider coverage, and a longer lifespan.

This lightweight and durable upgrade offers superior resistance to shock and vibration, making it a reliable and energy efficient solution for every flight.

### KEY BENEFITS

- ✓ Brighter illumination for improved operational efficiency
- ✓ Lower energy consumption, optimizing overall performance
- ✓ Longer lifespan, reducing maintenance frequency and costs
- ✓ Increased reliability with shock- and vibration-resistant design
- ✓ Enhances aircraft visibility during ground operations
- ✓ Minimizes the risk of Controlled Flight Into Terrain (CFIT) and bird strike

### INSTALLATION

The Service Bulletin for the installation of Taxi & Landing LED Lights is **SB 505-33-0010**
